NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

PURCHASE OF STAR

The semimonthly issues and the cumulative index issues are available postpaid on subscription and in single copy from the Supertintendent of Documents, United States Government Printing Office, Washington, D.C., 20402, United States of America.

Semimonthly issues . . .

Annual subscription rate: \$54.00, domestic; \$68.25, foreign. Price per single copy: \$2.25, domestic; 25% extra for foreign mailing.

Cumulative index issues . . .

Annual subscription rate: \$30.00, domestic; \$35.00, foreign. Price per single copy varies according to the number of pages.

Domestic subscription rates . . .

Apply to the United States, Canada, Mexico, and all Central and South American countries, except as noted below.

Foreign subscription rates . . .

Apply to Argentina, Brazil, French Guiana, Guyana, Surinam, British Honduras, and all other countries throughout the world.

Payment should be by check, money order, or document coupons, and must accompany order. Remittances from foreign countries should be made by international money order, or draft on an American bank, payable to the Superintendent of Documents, or by UNESCO book coupons.

PUBLISHED BY:

UNITED STATES GOVERNMENT
NATIONAL AERONAUTICS AND SPACE ADMINISTRATION
SCIENTIFIC AND TECHNICAL INFORMATION DIVISION

Scientific and Technical Aerospace Reports, Volume 6, is prepared by the NASA Scientific and Technical Information Facility operated for the National Aeronautics and Space Administration by the Technical Information Services Company.

Use of funds for printing this publication approved by the Director of the Bureau of the Budget June 7, 1966.

Scientific and Technical

Aerospace Reports

Annual Indones (Section II) January-December 1988

SPECIAL NOTICE

Starting with this issue of Scientific and Technical Aerospace Reports Annual Indexes, several significant changes have been made, not only in the format of this publication, but also in procedures for requesting the documents indexed. These are explained in the Introduction to Sections I or II; please read it through before referring to the Indexes.

The abstract sections of the semimonthly STAR issues can be bound separately. Individual abstracts can be located readily by means of the page numbers given at each index entry, e.g., 21 p 4190. To assist the user in binding STAR Volume 6, four title pages are included in the back of Section I of the Annual Indexes.

THAT STAR ANNUAL INDEXES ARE

Enga. 2629.13 4 58TA ACTUAL SUIDO Marriagad mentrade virialmenta rigidi. V.6 1968 Index C. 99 Sustrates a case where two

These Annual Indexes are edited consolidations of the indexes to the individual issues of Scientific and Technical Aerospace Reports (STAR) for the calendar year 1968 (Volume 6. Numbers 1 through 24). For the convenience of the user, they are divided into four sections, each bound separately. Sections I and II contain the Subject Index. Section III contains the Personal Author Index. Section IV contains a Corporate Source Index. a Contract Number Index, a Report/Accession Number Index, and an Accession Number/ Report Index. The Annual Indexes supersede the semimonthly and quarterly indexes previously issued during 1968. 2. Other U.S. Covergnment agencies 1 to Initity of the Lors. T

Each entry in these indexes includes a group of identifying numbers in the following form: 06 p 0850 N68-23456. The first two digits (06) identify the issue in which the document was announced. The "p" stands for page number, and the four digits that follow (0850) refer to the page number, in the designated issue, on which the abstract of the document appears. The next group of numbers (N68-23456) is the NASA Accession Number, a unique identification number assigned by NASA to each document that was acquired, indexed, and announced in STAR during the year.

In addition to these identifying numbers, each entry in the Subject Index contains a Notation of Content, a brief description of the contents of the document; each entry in the Personal Author and Corporate Source Indexes contains the exact title of the document.

All documents announced in STAR are evaluble to the public

At the beginning of each index in this cumulation, a typical listing is illustrated with each of its elements identified to assist the reader in using the different types of index Selected NASA documents are formally conted and are available within

HOW TO USE THE SUBJECT INDEX and address and an arranged translation and an arranged translation and arranged translation arranged translation and arranged translation arranged

Subject terms in this cumulative index are arranged alphabetically, and are supplemented with cross-references which are intended to serve as directions that will enable the user to modify, enlarge, or narrow his search in accordance with his specific interests. Two types of cross-references are used; at the figure of agreed contract of the follows are feared

- 1. Use (U) references indicate that the subject term is not "postable", i.e., not a valid term, and that the following term or terms are used instead. For example.
- FIGURE COLUMBIUM PRED O STREET PROSPERITORIES DE CONTROL DE LA CONTROL D
 - U NIOBIUM
- Menoral Lending Library UVLL) for Science and Technology transTSL RALLINIA
- Will at the price supplication the citation december | WORLD ANNULAR FLOW
 - U JET FLOW found of bendumment to the shares its religious Astronouses
- 2. Narrower Term (NT) references indicate that the subject terms following the NT notation represent more specific concepts than the terms used. For example.

toll consumer studeness of the earthur and Caster I

- EMISSION
 - NT ELECTRON EMISSION AND AND A THE HALL OF THE PROPERTY OF THE
 - NT NEUTRON EMISSION
 - NT THERMAL EMISSION

Finally, a searcher should use the notations of content in the Index to narrow further his quest for particular items. This is because subject terms can readily include more than one class of document. For example:

CATHODES

Cesium plasma cathodes as sources of high intensity electron beams. Cathode material testing in electro-

chemical half cells.

illustrates a case where two references on different topics are listed under the same subject term.

AVAILABILITY OF STAR

STAR is available to the public on subscription from the Superintendent of Documents, U. S. Government Printing Office as noted on the inside cover. STAR is also available without charge to the following:

- 1. NASA Offices, Centers, contractors, subcontractors, grantees, and consultants;
- 2. Other U.S. Government agencies and their contractors;
- Libraries in the United States that have arrangements with NASA to maintain collections of NASA documents for public use;
- Other organizations in the United States having a need for NASA documents in work related to the aerospace program; and
- Foreign government or academic organizations that have established appropriate reciprocal arrangements with NASA.

AVAILABILITY OF DOCUMENTS

All documents announced in STAR are available to the public as indicated in the citation.

AVAILABILITY OF NASA DOCUMENTS

NASA documents are identified by an asterisk in the abstracts section and in the report/ accession number and accession/report number indexes. NASA documents that have been microfiched (identified by the # sign in citation) are available on microfiche without charge to an organization eligible to receive STAR.

Selected NASA documents are formally printed and are available without charge in printed form on initial distribution to the organization eligible to receive STAR.

AVAILABILITY OF NON-NASA DOCUMENTS

Non-NASA documents are those documents that do not carry an asterisk in the citation. Department of Defense documents (identified by the "AD" number in the citation and indexes) are available subject to a service charge in hard copy or microfiche from the Clearing-house for Federal Scientific and Technical Information, Springfield, Virginia 22151. Microfiche copy of DOD reports will continue to be available to Defense Documentation Center users at no cost from the Defense Documentation Center, Cameron Station, Alexandria, Virginia 22314.

National Lending Library (NLL) for Science and Technology translations are available from NLL at the price stipulated in the citation. Requests for purchase should be addressed to:

National Lending Library for Science and Technology

Boston Spa, Yorkshire, England.

Dissertations selected from *Dissertation Abstracts* are available in xerographic copy (HC) and on microfilm (MF) for sale from University Microfilms, Inc., Ann Arbor, Michigan, 48106. All requests should cite the author and Order Number as they appear in the citation. Note that the dissertations are provided on microfilm and not microfiche.

MT THERMAL EMINSION

⁽¹⁾ A microfiche is a transparent sheet of film, 105 × 148mm in size, capable of containing up to 72 pages of information reduced to micro images (not to exceed 20:1 reduction).

Other non-NASA documents are publicly available as indicated in the citation. These documents which have been microfiched are available on microfiche without charge only to NASA Offices. Centers, contractors, subcontractors, and consultants.

county its, \$35.00 postpandor susse it

HOW TO OBTAIN MICROFICHE

If you are registered with NASA and eligible to receive reports as described above, send the completed Document Request (Facility Form 492) to:

NASA Scientific and Technical Information Facility
P. O. Box 33
College Park, Maryland 20740

If your are not registered with NASA and wish to receive information concerning registration, request Registration Form-Technical Publications (Facility Form 713) from the NASA Scientific and Technical Information Facility at the address given above.

Others may obtain microfiche copies by purchase from:

Clearinghouse for Federal Scientific and Technical Information
(CFSTI)
Springfield, Virginia 22151

U. S. GOVERNMENT SALES AGENCIES

Publications with a CFSTI availability statement in the citation are sold in hard copy and microfiche copy by:

Clearinghouse for Federal Scientific and Technical Information (CFSTI)

Springfield, Virginia 22151

The following unit price has been established by CFSTI: \$3.00 for hard copy. \$0.65 for microfiche.

Publications with a SOD availability statement in the citation are sold in hard copy by:

Superintendent of Documents, U. S. Government Printing Office (SOD)

Washington, D. C. 20402

NASA documents available from the SOD are also available from CFSTI at the SOD price given in the citation.

NOTE: Documents announced without a specific availability statement may be requested from the issuing activity.

Bibliographic information, e.g., report number, etc., rather than the NASA accession number (i.e., N68-12345), should be provided when requesting a document from other than NASA.

COSATI SUBJECT CATEGORY CODE

In the citation of each NASA-supported document and of some non-NASA documents is a code, e.g., CSCL 25A that indicates the subject category assigned to it from the COSATI Subject Category List (first ed. December, 1964) published by the Committee on Scientific and Technology.

ABSTRACTS OF JOURNAL ARTICLES

By arrangement between NASA and the American Institute of Aeronautics and Astronautics, the AIAA publication International Aerospace Abstracts is issued in coordination with STAR.

Each journal appears on alternate weeks. IAA uses subject categories identical with those in STAR, and publishes similar indexes. IAA's worldwide coverage of books and journals complements STAR's worldwide report coverage. The two publications thus provide comprehensive access to current literature on aerospace science and technology.

Organizations having a NASA contract may obtain *IAA* by writing NASA, Code USS-A, Washington, D. C. 20546. Others should direct inquiries to the American Institute of Aeronautics and Astronautics, 750 Third Avenue, New York, New York 10017.

A-789-3

Annual subscription rates for IAA:

Semimonthly issues: United States and possessions, \$54.00 postpaid; foreign countries, \$68.25 postpaid.

51

Cumulated Index Volumes: United States and possessions, \$30.00 postpaid; foreign countries, \$35.00 postpaid.

INDEXING VOCABULARY

The Preliminary Edition of the NASA Thesaurus (December 1967) (NASA SP-7030) is used as the authority for the indexing vocabulary that appears in the subject index. The NASA Thesaurus should be consulted in examining the current indexing vocabulary including associated cross reference structure. Only the subject terms that have been selected to describe the documents abstracted in this issue appear in the subject index. Copies of the NASA Thesaurus may be obtained from the Clearinghouse for Federal Scientific and Technical Information or the U. S. Government Printing Office at \$8.50 for the three-volume set.

Description and design of deoplasmatron proton ion source for particle accelerators	Analysis methods for plastic deformation of struc- tures under dynamic loading	Internal friction in nickel single crystals at low tem- peratures		
[LA-DC-9421] 21 p3743 Non-34313	[BU/NSRDC/1-67] 02 p0275 N68-11422	[TR-9] 11 p1775 N68-2169		
Designs and performance tests of three phase alter- nating current plasmatrons intended for obtaining low	Torsional loss of stability in plastic deformation 02 p0278 N68-11674	Necking, yield, and plastic flow in electrical analogs of mechanical systems with respect to energy conver- sion effects on mechanical behavior of various materi-		
[FTD-MT-24-235-67] 22 p3943 N68-35392	Mechanics and thermodynamics of plastic deforma- tion analyzed in terms of general assemblage or con- tinuum of elastic perfectly plastic elements or states	als [NASA-CR-1039] 12 p1919 N68-21949		
Magnetic field of levitated superconducting quadru- pole	tinuum of elastic perfectly plastic elements or states [TR-54] 02 p0279 N68-11764	Thermal stresses and elastic-plastic stress deforma- tion for bonded dissimilar media with straight cracks		
[IPP-2/67] 24 p4304 N68-38489 PLASMOIDS	Plastic deformation of zirconium during oxidation	along interfaces		
U PLASMAS [PHYSICS]	[WAPD-TRANS-72] 03 p0353 N68-12674 Compressive deformation testing and transmission	12 p1975 N68-22100		
PLASMONS	electron microscopy studies of plastic deformation in long range ordered iron and aluminum alloys [IS-T-180] 03 p0354 N68-12710	Structural changes in chromium during high tem- perature and low temperature deformation, and after		
Plasmons, quasi-particle excitations, inductance of superelectrons, and gain and inductance advantages for parametric amplification		[NASA-TT-F-11652] 13 p2082 N68-23591		
parametric amplification 05 p0701 N68-14466	Stress-strain curves for plastic deformation analysis of compressed polycrystalline iron silicon alloys	Fracture strength, brittleness, and plastic deforma- tion in metals		
PLASTERS U GYPSUM	of compressed polycrystalline iron silicon alloys [IS-T-128] 03 p0354 N68-12723	[NYO-2394-31] 13 p2083 N68-23789		
The state of the s	Methods and experimental conditions for creep anal- ysis and plastic deformation determination related to	Influence of impurities on strain orientation in low alloyed alpha uranium		
PLASTIC AIRCRAFT STRUCTURES	materials testing	alloyed alpha urumium [JPRS-45470] 14 p2269 N68-24632		
Electroplated nickel coatings for protecting plastic aircraft components from damaging effect of rain	[ONERA-NT-[14] 04 p0587 N68-13130	Deformation, stress, and strain distributions in		
[AFML-TR-67-356] 13 p2086 N68-23202	Effect of plastic anisotropy on flange wrinkling while drawing sheet metal between dies and blankholders	clamped-edge thin elliptic plate under load 14 p2360 N68-25387		
PLASTIC ANISOTROPY	[COA-NOTE-MAT-12] 04 p0515 N68-13317	Acoustic energy emission from plastic deformations		
Anisotropic plasticity in sheet metal under stress	Plastic response of circular uniform plate to axisym- metric impulse load of Gaussian distribution	related to nondestructive testing [UCRL-70750] 14 p2266 N68-25456		
from tensile tests [COA-NOTE-MAT-15] 15 p2479 N68-25674	[NASA-TR-R-279] 05-p0750 N68-14640	Damage mechanisms of cantilever beams mounted		
Correlations between crystal orientation, texture,	High temperature tests of dimensional changes ac-	on floating shock platform and shock tested by un- derwater explosions		
deformation, and plastic anisotropy of Rockwell hard- ness indentations in T and Mo crystals	companying plantic deformation of pyrolytic graphite [NASA-CR-91832] 05 p0681 N68-14797	14 p2365 N68-25531		
18 p3152 N68-29976	Plastic strains calculated in symmetrical blank forced into ellipsoidal die	Analysis of elastic-plastic large deflection response of shell structures to blast loads using finite difference		
PLASTIC COATINGS	05 p0669 N68-14862	method 14 p2366 N68-25544		
Linear polyethylenes for communication and power cable coatings	Ultrasonic studies of single crystal plastic deforma-	Energy dissipation analysis for sheet metal plastic		
[AD-656509] 01 p0080 N68-10075	tion in gallium and of amplitude dependence in lead [AFML-TR-67-72] 05 p0730 N68-14992	deformation 14 p2301 N68-25627		
Polymonotrifluorochloroethylene insulated wire [AD-656319] 01 p0036 N68-10148	Cyclic deformation of neutron irradiated copper sin-	Experimental measurement of small angle scattering		
Fluidized bed polymeric coating of large steel missile	gle crystals [AERE-R-5595] 06 p0853 N68-15108	Experimental measurement of small angle scattering of subthermal neutrons on plastically deformed cube centered copper single cryatals		
container [PA-TR-3569] 03 p0347 N68-12122	Plastic deformation and magnetic properties of metals, and equilibrium and kinetics of phase transfor-	15 p2513 N68-25860		
Protective coatings, and materials for radiation shielding of suclear technology structures - epoxy sur-	mations	Neutron irradiation and plastic deformation on yield surface of polycrystalline copper		
shielding of nuclear technology structures - epoxy sur- face layers, concrete construction materials, and	06 p0856 N68-15988	15 p2539 N68-26337		
polymer films [FTD-HT-66-691] 06 p0873 N68-15409	Axisymmetric elastic/plastic problem for plate weakened by circular hole	Structural analysis of plastic spherical sandwich shells under hydrostatic pressure		
Adhesive polyethylene, and polyvinyl chloride layers	07 p1088 N68-16164	15 p2571 N68-26532		
for protective surface coatings against radioactive con- tamination	Finite difference analysis of elastic-plastic collapse of shell structures under blast loads	Flow stress analysis using tensile tests on titanum, zir- conium, and Zircaloy 2		
06 p0874 N68-15411	[SC-DC-67-1923] 07 p1088 N68-16220 Plastic fatigue embrittlement of steels for reactor	[ORO-3262-5] 15 p2485 N68-26613		
Epoxy coatings for radiation protection of metal, and concrete surfaces	vessels	Finite deformations of plastic circular arch and relaxation moduli of anisotropic linear viscoelastic		
06 p0874 N68-15413	[EURAEC-1892] 07 p1009 N68-17004	solids 15 p2571 N68-26626		
Neoprene coating technique for rain erosion tests on glass fiber polyester laminates	elastic-plastic problem for torsion of solid prismatic bar	Shear stress and activation energy and volume for deformation of silver and niobium alloys in solid solu-		
09 p1356 N68-19402	Successive approximation procedure for solving elastic-plastic problem for torsion of solid prismatic bar made of strain hardening material (NASA-TN-D-4391) 07 p1092 N68-17045	deformation of silver and niobium alloys in solid solu-		
Flexible urethane lacquer sealant for corrosion pro-	Statistical model for brittle deformation of stressed	[COO-916-13] 15 p2486 N68-26826

Preparing PETN-impregnated polyurethane foams capable of iniation by gaseous detonation waves [NRC-10168] 19 p3299 N68-31841

Chemical properties of polyurethanes and viscoelastic behavior of ionomers 20 p3509 N68-32576

Air Force experiences with reticulated foam and other means of inerting, suppressing, or purging fuel system fires 23 p3988 N68-36272

Vent holes for reduced carbon dioxide pressure generation during feaming of polyurethane resin [GEPP-11] 23 p4068 N68-36732

Buoyance blocks of balsa and polyurethane four tested for strength against damage in underwater explosions [TL-1968-8] 23 p4085 N68-37252 Evaluation of gas chromatographic determination of

Evaluation of gas chromatographic determination of trichlorofluoromethane in polyol component of polyurethane foam [NASA-TM-X-53792] 24 p4216 N68-37890

POLYURETHANE RESINS

Structure-property study of polyurethane, epoxy, polyisocyaniarate, and polyoxazolidone adhesives [NASA-CR-90034] 01 p0080 N68-10128

Preparation of si-heterocyclic, b-heterocyclic and spiro type ladder polymers [SC-RR-67-478] 01 p0081 N68-10556

Shear modulus determined for polyurethane rubber containing biescodal mixture of coarse and fine sodium chloride particles (ONR-1R-7) 04 p0526 N68-13499

Silane coupling agents used as primers, and additives for polyurethane bonding [NASA-TM-X-53676] 04 p0326 N68-13510

Torsion tests to determine effect of filler content on glass transition temperature and glassy modulus of polyurethane rubber [WRE-TN-CPD-113] 08 p1189 N68-17312

Polyurethane coatings for subsonic rain erosion pretection of metallic, and plastic laminates 09 p1356 N68-19411

Molecular structure of polyester and polyether type polyurethanes

polyurethanes [TR.67-77-CM] 13 p2087 N68-23333 Bond line thickness, adherend etchant, and adherend primer effects on lap shear strength of polyurethane ad-

[NASA-CR-61808] 15 p2488 N68-26291 Polyurethane plastic coatings for rain impact erosion protection

protection [AFML-TR-67-355] 16 p2687 N68-27327

POLYVINYL ALCOHOL

Stress-strain, network topology, and optical coefficients of crosslinked polyvinyl alcohol gel, and depolarization of light by birefringent polymeric materials 18 p3098 N68-30035

POLYVINYL CHLORIDE

Simulation of water immersion resistivity of polyvinyl chloride electrical insulating compounds [AD-656404] 01 p0080 N68-10157

Tensile properties of plasticized polyvinyl chloride as function of processing variables and environmental exposure [AD-661402] 04 p0526 N68-13440

[AD-661402] 04 p0526 N68-13440 Infrared dichroism data on dehydrochlorinated polyvinyl chloride [ONR-TR-95] 10 p1490 N68-20129

Dichroism and birefringence theory for polyvinyl chloride containing oriented polyene segments [ONR-TR-92] Photodegradation of polyvinyl chloride exposed to

ultraviolet radiation (NASA-TM-X-59805) 15 p2487 N68-26106
